PROFESSIONAL SUMMARY

Managing 20+ global banking clients across EMEA and North America in Fixed Income, Repo, and Equities markets. Experienced in data analytics, automation, and stakeholder management, leveraging Power BI, Advanced Excel, and Python to drive operational efficiency and business outcomes. Delivered initiatives that reduced operational effort by over 80%, led revenue-impacting client engagements and executive workshops, and represented ION Group onsite in London on multiple occasions.

EXPERIENCE

ION Group

Feb 2025 – Present

Technical Account Manager (TAM)

Noida, Uttar Pradesh

- Successfully delivered 150+ client and ION-driven initiatives spanning platform migrations, infrastructure modernization, AWS cloud onboarding, change management, and large-scale technology transformation programs while consistently meeting client and delivery commitments.
- Led 30+ high-priority client escalations and cross-functional delivery across Product, Engineering, Support, Implementation, and Commercial teams, developing executive presentations, KPI dashboards, and strategic recommendations that drove product adoption, investment decisions, and successful client outcomes.
- Recognized as a Financial Markets SME and Product Consultant, partnering with Product teams to influence roadmap priorities, define client requirements, and drive technology transformation initiatives across 20+ global banking clients.
- Represented ION in London on multiple occasions in recognition of product expertise and client leadership, leading strategic client engagements, executive workshops, and international training programs for 15+ business stakeholders.

Jan 2024 – Jan 2025

Business Operations Analyst

Noida, Uttar Pradesh

- Built a centralized TAM Intelligence Platform using Microsoft Power Platform to consolidate client, project, and commercial data across CRM and operational systems, reducing manual reporting effort by over 70% and providing real-time visibility into portfolio health, risks, escalations, and revenue opportunities.
- Developed a Streamlit-based Client Engagement Platform that automated and standardized large-scale client outreach, reducing communication effort by 83%.
- Built a Client 360 WebApp that automated meeting minutes, action tracking, client feedback management, and CRM synchronization, transforming client interactions into actionable insights and improving team productivity by over 70%.

Automation & Process Improvement: VBA, Power Platform, Workflow Automation, Process Optimization, Prompt Engineering

Platforms & Tools: Salesforce, Kimble, Jira, Confluence, Microsoft 365, Azure, AWS

PROJECTS

Multi-Agent Sales Intelligence System 🤖 | *Prompt Engineering, n8n, NLP, REST APIs, Docker*

August 2026

- Built and deployed a Dockerized sales intelligence web application with an HTML/CSS frontend, using n8n and Mistral AI to orchestrate 5+ specialized agents and automate personalized email drafting.
- Designed prompt engineering workflows to analyze company data collected through web-search APIs, identify business signals and opportunities, and convert the findings into targeted account strategies and sales recommendations.

Enterprise Customer Success Intelligence Platform (ECSIP) 🤖 | *Power BI, Power Automate*

January 2026

- Crafted an enterprise-grade Customer Success & Operations Intelligence solution leveraging Microsoft Power Platform to deliver a unified view of customer health, product adoption, operational performance, and renewal risk, supporting data-driven portfolio management across a simulated \$500M+ ARR customer base.
- Implemented KPI-driven analytics, automated alerting, and AI-powered insight generation to forecast churn risk, prioritize customer engagement strategies, and identify expansion opportunities, with modeled potential to improve renewal outcomes by 15–20% and reduce revenue exposure from at-risk accounts.

Client Communications Command Center 🤖 | *Excel VBA, Outlook Automation, Dashboard Reporting*

October 2025

- Designed an end-to-end Excel VBA automation platform to streamline client communication workflows, including client segmentation, communication targeting, feedback management, and audit tracking.
- Built an interactive executive dashboard using Excel formulas, structured tables, and pivot-style analytics to provide real-time visibility into campaign readiness, communication coverage, feedback status, follow-ups, and operational risk.
- Automated the creation of client feedback tracking workbooks and Outlook communication workflows, reducing manual effort through macros by 80%.

EDUCATION

Thapar Institute of Engineering and Technology

Aug 2020 – Jun 2024

B.E. in Electronics and Computer Engineering - CGPA 8.36

Patiala, Punjab
